

LEGAL NOTICE

and

Preliminary Determination for an Air Quality Permit for

Occidental Permian Limited

Occidental Permian Limited, PO Box 50250, Midland, TX has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to modify North Hobbs Unit - Reinjection Compression and Injection Tank Battery. The application file has been assigned Permit No. 2656-M6 and TEMPO Agency Interest ID No. 2415. The exact location of the facility is at latitude 32 degrees, 43 minutes, 15.65 seconds and longitude -103 degrees, 12 minutes, 3.49 seconds. To aid in locating this facility, the approximate location is 3 miles northwest of the intersection of County Road 65 and County Road 61 in Hobbs, Lea County, New Mexico.

The proposed modification will consist of: (1) Replace existing WIB flare with new WIB flare with increased capacity; (2) Add additional equipment at the WIB including: second inlet separator, two new low pressure electric driven compressors, three water injection pumps; and one additional water tank; (3) Add additional equipment at the RCF including: second inlet slug catcher, one new electric driven reinjection compressor, and two new glycol dehydration system vapor recovery units (VRUs); (4) Increase RCF maximum throughput from 150 MMscfd to 180 MMscfd and document RCF flare capacity to be 180MMscfd; (5) Reduce RCF plant's two glycol dehydrator capacities from 95 MMscfd each to 90 MMscfd each; (6) Increase WIB maximum gas throughput from 1.0 MMscd to 1.5 MMscfd and produced water production from 131,000 to 154,000 bbl/day; (7) Update permit documentation for the RCF and NGL plants' vapor recovery units and their configurations; and (8) Update emissions documentation for authorized start-up, shutdown, maintenance and upset-related emissions events, resulting in an overall reduction in authorized emissions; and (9) Update fugitive emissions from piping components.

Total air pollutant emissions to the atmosphere are estimated to be approximately Nitrogen Oxides (NO_x) at 25 tons per year (tpy); Carbon Monoxide (CO) at 40 tpy; Volatile Organic Compounds (VOC) at 65 tpy; Sulfur Dioxide (SO₂) at 90 tpy; Total Suspended Particulate Matter (TSP) at 0.8 tpy, Particulate Matter 10 microns or less (PM₁₀) at 0.8 tpy, and Particulate Matter 2.5 microns or less (PM_{2.5}) at 0.8 tpy, Hydrogen Sulfide (H₂S) 13 tpy, and Total HAPS (Hazardous Air Pollutants) 2 tpy. These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's analysis of ambient air quality impacts indicates that the facility's air emissions will meet the air quality standards for NO_x, CO, SO₂, PM₁₀, PM_{2.5}, and TSP. VOCs are a pre-cursor to ozone and the NMED does not require an individual ozone ambient impact analysis for each application. To determine compliance with national ambient air quality standards for ozone, NMED uses air monitors to monitor ozone concentrations. A full review will evaluate the estimated emission rates for the pollutants listed in this public notice and determine compliance with ambient air quality requirements and standards.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 3, 7, 37, 38, 61, 72, 73, 75, 77, 80 and 82; 40 CFR 50; 40 CFR 60 Subparts A and KKK; 40 CFR 63 Subparts A,

HH, ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before December 16, 2014. This source is a PSD minor source according to 20.2.74 NMAC.

The permit application is available for review in electronic or hard copy at the Air Quality Bureau Office, 525 Camino de los Marquez Suite 1, Santa Fe, New Mexico. To arrange viewing of this application contact Teri Waldron, at 505-476-4355 or teri.waldron@state.nm.us. The permit application is also available at the NMED Hobbs Office, 726 E. Michigan - Suite 160 Hobbs, NM 88240 for public review.

All interested persons have thirty (30) days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, facility name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Rhonda Trujillo, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 525 Camino de los Marquez Suite 1, Santa Fe, NM 87505-1816.

The Department will notify all persons, who have provided written comments as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing before the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment before the end of the Department's thirty (30) day public notice, the Department's analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Rhonda Trujillo at 505-476-4354. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.
